

SAURABH K. SHARMA

Frontend Engineer · React & TypeScript · Design Systems

Ghaziabad, India · +91 8726181610 · iamvillanity@gmail.com · [linkedin.com/in/villanity](https://www.linkedin.com/in/villanity) · github.com/villanity

Frontend Engineer with 6 years of experience building and shipping production React applications at SaaS companies across India, the UK, and Spain. Deep expertise in component architecture, state management, performance optimisation, and design systems — with the added advantage of professional Figma design skills that eliminate the back-and-forth between design and engineering. Proven track record: 45% lift in task completion, 35% engagement increase, 23% reduction in task time. Seeking a React or Frontend Engineer role at a product company where I can own the UI layer end-to-end.

TECHNICAL SKILLS

Frontend: React.js · Next.js · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · Tailwind CSS · SASS/BEM · AngularJS

State & Data: Redux · Zustand · React Query (TanStack) · Context API · REST APIs · API integration · WebSocket

Testing & Tooling: Jest · Cypress · Vitest · Storybook · Vite · Webpack · Git / GitHub · CI/CD · Vercel · Netlify

Design: Figma · Design Systems · Design-to-Code · WCAG 2.1 Accessibility · Adobe XD

Practices: Component Architecture · Performance Optimisation · SSR / CSR · Responsive Web Apps · Agile/Scrum · A/B Testing

WORK EXPERIENCE

Frontend Engineer · Jobstoday World SL

Jul 2025 – Present

Madrid, Spain · Remote

- Architected and shipped the employer dashboard and candidate portal from Figma specs using React, TypeScript, and component-driven architecture — improving user retention by 20% through redesigned core workflows.
- Built a reusable React component library with Storybook documentation, reducing UI inconsistencies platform-wide and cutting feature delivery time for the engineering team.
- Owned full QA cycle: cross-browser testing, responsive validation, performance profiling, and user acceptance sign-off before every production release.
- Streamlined job posting and candidate management flows through interaction redesign and frontend performance optimisation, measurably reducing task completion time.

Frontend Engineer · DataGardener Solutions

Jul 2023 – Jun 2025

United Kingdom · Remote

- Redesigned and re-implemented the company website frontend using React and Next.js (SSR), increasing user engagement by 35% through improved UX, information architecture, and code-level performance optimisation.
- Built a unified design system across web and dashboard products — shared components, design tokens, and interaction patterns — strengthening brand consistency and front-end scalability.
- Established reusable component architecture with Storybook and comprehensive developer handoff documentation, reducing design-to-development iteration time significantly.
- Integrated REST APIs and managed global state with React Query and Context API, improving data-fetching reliability and reducing client-side loading times.

React Developer · Sankalp Shiksha

Oct 2021 – Jun 2023

Noida, India

- Led React frontend development for ThyCard SaaS product — implemented Redux state management, reusable component system, lazy loading, and performance tuning, improving task completion rate by 45%.
- Built an investor-ready React prototype for FiFiGo, translating product vision into a polished, scalable frontend interface with a reusable component library, delivered on schedule.
- Ensured full WCAG 2.1 accessibility compliance across all products; mentored junior engineers on accessibility standards and design system best practices.
- Collaborated cross-functionally with product managers from ideation through production, owning both design and engineering across the full feature lifecycle.

Frontend Developer · Tranzita Systems

Mar 2020 – Sep 2021

Lucknow, India

- Developed and redesigned the HRMS platform frontend using AngularJS and a custom component library, reducing task completion time by 23% through improved workflows, interaction design, and responsive layout.
- Conducted usability testing sessions and drove iterative UX improvements; partnered with backend developers to implement consistent, scalable UI across the platform.

KEY PROJECTS

Analytics Dashboard — *React · TypeScript · Recharts · REST API · React Query*

Data-driven dashboard with real-time charts, filterable tables, lazy-loaded modules, and dark mode. Designed in Figma and implemented with full component architecture — demonstrates end-to-end design-to-code workflow.

NordRide — Ride-Sharing Platform — *React · Node.js · Google Maps API · Storybook*

End-to-end ride-booking app with live tracking UI, booking flow, driver dashboard, API integration, and a Storybook component library. Case study on Behance.

Investor Portfolio App — *React · TypeScript · D3.js · WCAG 2.1*

Fintech dashboard for tracking portfolio performance with real-time data, D3 visualisations, full accessibility compliance, and responsive layout across breakpoints.

EDUCATION & CERTIFICATIONS

Bachelor of Science — DDU Gorakhpur University, Gorakhpur

Google UX Design Professional Certificate — Google

Fullstack JavaScript — Fynd Academy

Google Gemini API AI Workshop — AICamp
